The Office Action

Examiner rejected claims 1-54. Examiners remarks indicate that the examiner is basing the rejections on the application entitled "Apparatus, Method and System for Providing Conditional Answering in Multiple Leg Telecommunications Sessions".

However, on September 2, 2004, Applicant's Petition to have the application corrected was granted. On September 15, 2005, Applicant responded to the March 15, 2004 Office Action requesting that the examiner reconsider and withdraw the Office Action. In Applicant's remarks, applicant cited the portion of the Decision of the Petition that stated that the application was to be reprocessed using the 30 page specification entitled, 'Apparatus, Method and System for Maintaining Call Control at a Gateway Mobile Switching Center Utilizing a Packet Network' that was supplied with the petition.

Because the examiner's rejections were not based on the correct application, Applicant respectfully requests that the examiner reconsider and withdraw the Office Action mailed on April 22, 2005.
